

PM-N25 - Magnetic separator

Features:

- Compact design
- For installation in vertical pipework
- Three highly effective magnetic fields
- No power consumption
- Easy to clean
- Stainless steel housing and rods
- Optional collection/drain tray for contaminants
- Optional opening sensor
- Optional ATEX compliance

Pipe magnet:

Pipe magnets are permanent magnets designed to protect processing equipment and maintain product quality. They remove ferrous contaminants, preventing damage to machinery and contamination of products.

Pipe magnets are widely used in flour milling, feed and grain processing, the food industry, powder and bulk solids handling, the chemical, resin and plastics industries, and many other applications.
